

Fantom GD2000EU GreenDrive External Hard Drive - eSATA, USB

Fantom GD2000EU Green Drive External Hard Drive

This GreenDrive USB 2.0 Hard Drive is a power conscious step forward to provide maximum capacity and performance while reducing power consumption by up to 40%. The G-Force GreenDrive line of external USB and eSATA disk drives feature the latest advances in power saving technology and ROHS (Restriction of Hazardous Substances Directive) compliant materials and process. Minimize your carbon footprint, without sacrificing performance.

The GFantom GD2000EU GreenDrive External Hard Drive family features sturdy aluminum casing to provide maximum durability, fanless design for silent operation, and could be placed horizontally or stand vertically to allow maximum desk space. Fantom Drives' GreenDrives yield average drive power savings of 4-5 watts over competitors' drives while maintaining solid performance. That power savings equates to reducing CO2 emission by up to 60 kilograms per drive per year - the equivalent of taking your car off the road for 14 days each year. So be sure to pick up the Fantom GD2000EU GreenDrive External Hard Drive!

What It Is & Why Do You Need It?

- Features a sturdy aluminum casing for maximum durability, fan-free design for silent operation, and can be placed horizontally or vertically to increase desk space.

Key Features

- 2TB Capacity
- Fully ROHS compliant no lead construction
- eSATA and USB 2.0 interface
- Blazing fast 150MB/s eSATA port
- Quiet fan-free design
- PC & Mac compatible
- Compact aluminum enclosure

What's Included

- 1 GreenDrive
- 1 Drive Stand
- 1 USB 2.0 Cable
- 1 Power Supply
- 1 User Manual

Fantom Drive's GreenDrive USB 2.0 and eSATA disk drive features the latest advances in technology and ROHS (Restriction of Hazardous Substances Directive) compliant materials and process.

The Fantom Drive's GreenDrive USB 2.0 and eSATA hard drive features a sturdy aluminum casing for maximum durability, fan-free design for silent operation, and can be placed horizontally or vertically to increase desk space.

GreenDrive is Fantom Drive's answer to energy reduction and environmental responsibility by utilizing up to 40% less power without sacrificing performance.

The GreenDrive employs variable speed disk mechanisms that increase their rotational velocity in response to host demand, resulting in virtually no performance degradation vs. a 7200RPM disk.

Additionally, no lead is used in any component of the GreenDrive, making it Restriction of Hazardous Substances Directive (ROHS) as well as California Electronic Waste Recycling Act compliant. As a matter of fact, even the soy-based inks used to print the box are environmentally friendly.

Specifications

Performance	
Drive Type	External
Capacity	2 TB
Interface Type	USB 2.0
	eSATA 3Gbit/s
Average Seek (msec)	8.5
Data Transfer Rate on USB	up to 480Mbits/s (60MB/s)
Configuration/Organization	
Form Factor	3.5"
Hard Drives Additional Specs	
Device Type	Hard Drive
Capacity	2 TB
Interface	USB 2.0
	eSATA
External Drive Type	Desktop
