

Sentinel DX4000 8TB Storage Server - 4X2TB Drives included, 2x Gigabit Ethernet Ports, 2x USB 3.0 Ports, Secure Remote Access

WD WDBLGT0080KBK-NESN Sentinel DX4000 8TB Small Office Storage Server

Centralize your business files for convenient access and sharing with the WD WDBLGT0080KBK-NESN Sentinel DX4000 8TB Small Office Storage Server. The Sentinel storage server stores all the vital data of your business and with its automatic backup and RAID feature, you can be assured of a complete file protection. In the event of drive failure, the easy restore function searches your files and restores them to their previous location so you can run the operation again. The secure remote access provides anytime, anywhere access to business information to keep the production going in satellite or home offices. Setting up the WD WDBLGT0080KBK-NESN Sentinel DX4000 8TB Small Office Storage Server is simple and easy; just plug the device to your network and the administration dashboard will guide you through the process, including setting up data access, adding users, scheduling backups and creating shared folders. Two Gigabit Ethernet LAN ports, as well as two USB 3.0 ports are also included to deliver superfast connections that are essential in data transmission.

What It Is And Why You Need It:

- 8TB storage server; keeps all the business information in one reliable server
- Secure remote access; allows trusted users and partners to access the data wherever they are
- LCD display panel; monitor the device and alert status with ease
- Automatic backup and restore; minimizes downtime to keep production going
- RAID 5 support; provides extra data protection and high performance
- Dual Gigabit connectivity; achieve read speeds of up to 85 MB/s
- USB 3.0 ports; connect additional storage devices and experience up to 5Gb/s transfer rates

Plug-and-play installation

The easy set up process allows you to integrate WD WDBLGT0080KBK-NESN Sentinel DX4000 8TB Small Office Storage Server into your office network like a pro. The administration dashboard quickly guides you through the process including adding users, setting up data access, creating shared folders, and scheduling backups.

Easy To Set Up. Easy To Manage

Simple setup. WD Sentinel comes with everything you need to centralize your business files. Once it's set up, it intelligently manages drive and network status, reducing maintenance time so you can focus on your business.

Enterprise-Class Data Protection For Your Small Business

Built on proven technologies from industry leaders, WD Sentinel small office storage server offers your business a complete data protection solution for your peace of mind.

Built-In Remote Access

WD Sentinel enhances your business efficiency and productivity by enabling anytime, anywhere access to your business information. Your employees and trusted partners have secure access to your company files without the expense of a VPN solution.

complexity and

Plug-and-Play Installation

The easy set up process allows you to integrate WD Sentinel into your office network like a pro. The administration Dashboard quickly guides you through the process including adding users, setting up data access, creating shared folders and scheduling backups.

Easy Maintenance

Adding or replacing one of the pre-installed drives is as easy as changing a light bulb. Just open the door and swap out the drives and WD Sentinel does the rest. It seamlessly migrates the server to the appropriate RAID level and automatically expands the server's storage capacity. Your users can still access your business data while the drive is being integrated. No data loss. No down time.

Secure Remote Access

WD Sentinel is perfect for businesses with employees working in satellite or home offices because you have the security of knowing all your business files are safely stored in one place and remote employees can access them from any computer with an Internet connection. WD Sentinel also performs automatic daily backups so all of the files on all the computers in your network are backed up and protected.

Realtime System Status Through The Administration Dashboard

View realtime updates for drive, RAID and network status through WD Sentinel's Dashboard, which includes easy-to-use task wizards to help you set backup schedules, administer user accounts and manage public and private shares.

LCD Display Panel Readily Offers Critical Information

The LCD display panel on the front of the device allows you to monitor the system status and critical alerts.

A Total Solution With Industry-Leading Technology Partners

We combined hardware and software from industry leaders to deliver a reliable, secure and easy-to-manage storage server designed specifically for small office environments. WD Sentinel features:

Stream Digital Media Anywhere In Your Network

DLNA media server your employees can access any shared media libraries on than maintaining copies on their individual computers. You can also stream digital content like videos, music or digital signage for employees, vendors or clients using remote web access.

With the built-in the network rather

Leading-Edge Performance

With dual Gigabit Ethernet connectivity, WD Sentinel DX4000 delivers read speeds up to 85 MB/s through the Gigabit Ethernet interface. That's three times faster than most network drives in this category today. For maximum flexibility there are also 2 SuperSpeed USB 3.0 ports that allow you to connect additional storage devices and experience up to 5Gb/s transfer rates.

Compatible With Multiple Operating Systems

WD Sentinel includes the Connector software for Windows XP, Windows Vista, Windows 7, Mac OS X Leopard and Mac OS Snow Leopard. Support for major network file-system protocols enables cross-platform compatibility and file sharing among Windows, Mac and Unix/Linux operating systems.

Connect. Protect. Collaborate.
