## StorCenter ix2 Network Storage

Model#: 35547

Central storage & backup. Advanced data protection. Cloud convenience.

The lomega® StorCenter™ ix2 Network Storage device offers central storage and backup with advanced security and cloud convenience – ideal for small and remote offices, workgroups or home networks. Based on enterprise-class EMC® storage technology, the StorCenter ix2 provides easy file sharing, iSCSI block access, RAID 1 (Mirroring) for optimized data protection, and multiple RAID configurations for optimized data protection. lomega Personal Cloud technology offers unparalleled simplicity and versatility for data sharing and protection. Business users will appreciate the robust data protection features such as UPS support, folder quotas, and user replaceable drives for business continuity and disaster recovery. The easy-to-use interface provides no-hassle management. Active Directory support and remote access round out the comprehensive business features.

### Key Features:

- Enhanced operating system
- User replaceable hard drives
- Create users and manage access to shared folders
- Virtual environment support
- Energy saving features

### Backup & Data Protection

- Automated install of client backup with lomega QuikProtect support for PC or Time Machine for Mac® with full system protection
- Configuration Backup & Replay (CBR) to save and restore administrative system settings
- Device-to-device replication – replicate your data from StorCenter to StorCenter, to an external USB drive, or to another network target
- SFTP (Secure File Transfer Protocol) support
- Two drive RAID 1 mirror

### Gigabit Ethernet

- Central access to all your files make it perfect for organizing and sharing
- Easy-to-use wizards help you create users and manage access to shared folders
- Built-in torrent support for peer-to-peer file sharing
- Access files from any web browser via lomega Personal Cloud
- Stream media to your mobile device with the lomega Link remote app

### Exceptional Speed, Performance & Usability

- High performance Marvell 1.6 GHz processor
- 256MB RAM
- SATA II low power drives
- GbE network connectivity
- USB device connectivity for printer sharing or transfer of data to/from an external USB hard drive
